

24-7 Monitoring

Now open for your business!

24-7 Monitoring is a specialist security monitoring centre working in partnership with leading UK installers. Switching over your customers monitoring to us, will help **increase your turnover** in a number of ways. Our value added monitoring goes a lot further than most **starting at just £20 per customer per annum***. When it comes to offsite verification we can monitor **BS8418 systems from as little as £1,200 per annum** which all adds up to a great deal more profit for you. We deliver unsurpassed levels of service and support to installers and their customers, ensuring they receive total **peace of mind monitoring** around the clock, 24-7. Our dedicated Account Managers ensure both local and national coverage and professional help and advice, with the objective of providing cost effective monitoring for you the installer to **improve your bottom line.**

Working with 24-7 Monitoring you'll find it's not only the profit potential that's appealing!

Choosing 24-7 Monitoring for your customers can help improve your turnover in a number of ways:

- 24-7 Monitoring starts from just £20 per customer per annum*.
- You set the price for your customers' monitoring, we leave that to you – the higher your charge; the more you keep.
- Regarding offsite verification we monitor BS8418 systems from £1,200 per annum.
- You remain totally independent.
- We continue to invest in the latest advances in security technology to provide you with excellent levels of service, which not only meet but exceed your expectations.
- 24-7 Monitoring is fully compliant with current NSI Standards.

We hope this gives you an insight of how you can benefit by switching your customers to 24-7 Monitoring. If you would like more information, contact Pete Tait, ARC Manager on:

* Subject to the number of connections. Please call for site-specific quotations.

Total peace of mind security around the clock

24-7 Monitoring ensures that both you and your customers property/premises are in safe and competent hands whenever you need us. Just like our name, we are always there, ready to react immediately to each signal a system generates. With direct links to police and fire brigades throughout the land, our purpose is simple. Our Operators assess each reported event then instigate the necessary response, with the emergency services contacted instantly to qualifying situations.

Our Services

Our service essentially covers the monitoring of fire alarms, personal attack and hold-up alarms, intruder alarms and detector-activated CCTV systems. Our overall commitment to quality and customer focus means we provide dedicated support to ensure you and your customers receive the very best added-value service. Out-of-hours entry to site, late opening or early closing of premises, and monitoring of plant or equipment failure are examples of how we proactively help many clients. Others might simply require periodic reports detailing open/close times of premises for management information purposes.

Software Access

Our Alarm Handling software has a customer log-in facility, with authenticated secure access. This allows internet extraction of event reports and the ability for your customers to manage and update their own keyholder contact information.
